

STATEMENT

As an environmentally conscious company, tesa SE strives to reduce the use of limited natural resources. For this reason, tesa qualifies suppliers who use Post-Consumer Recycled (PCR) content in their materials.

The Polyethylene Terephthalate (PET) film from the ISO9001-certified manufacturer was analyzed via the ISO 14021: 2016 Calculations for Recycled Content method by a 3rd party organization, which confirmed the 70% post-consumer recycled content claimed by the supplier.

The original certificate, which is valid until the 1st of September of 2022, can be reviewed during a related on-site audit.

Best regards
